Subject: FW: Cooperative solution for Dewatering Possum Point Lagoon Water

Ken,

We do not give contacts information to others so I refused to give your information to Mr. Rigby. We were, however, asked to forward the information in the email below to you in case you are interested. If you are interested, please contact Mr. Rigby directly.

Thanks, E

Subject: Cooperative solution for Dewatering Possum Point Lagoon Water

Hello Steve, Edie and Brian,

After speaking with Steve on Wednesday when we discussed the dewatering of the Virginia Dominion Power Possum Point coal ash lagoon dewatering he mentioned VaDP has been in touch and requested the PWCSA accept pumped lagoon water into the Mooney WWTP.

I responded that our work at Potomac Shores for Argent Management has a planned large Pump Station #2 nearly adjacent to Possum Point along with a new 16" force main. It occurred to me that a cooperative approach to developing the Pump Station #2 and force main could greatly reduce the cost and timing for VaDP and could greatly benefit Potomac shores in financing the construction of ultimate wastewater facilities.

I met this morning with Eddie Byrne, VP and Brian English, Sr. PM with Argent at Potomac Shores and they were in favor of opening discussions with VaDP.

In reporting my meeting to Steve, he (you) asked that I send this email to initiate the cooperative conversations between all three parties.

I will let Steve take it from here and Eddie and Brian, please do not hesitate to communicate directly with Steve (703) 393-2062.

Also, I haven't spent any time at the site but CSX is widening the tracks to provide a 3rd track and an above grade pipe with Victaulic couplings – like is commonly used in the oil fields, would be a cost effective way to pump the lagoon water to the new Pump Station #2.

I'm off to the WEF conference in Chicago now, back in the office on Thursday. I will receive calls and emails on my cell phone in the interim.

Thanks and good luck. David

David J. Rigby, P.E., PhD., President
